

Red hat

Red Hat Enterprise Linux is the industry-leading Linux that provides the foundation for next-generation architectures, with support for all major hardware platforms and thousands of commercial and custom application. When you develop on Red Hat Enterprise Linux, it means your apps are developed on the same platform that they will be tested and deployed on making it easier than ever for both traditional and agile development teams.

As a developer, students will have same stable and trusted platform that IT has adopted, plus the extra agility to utilize the latest tools and technologies that needs for application development.
