Seminar on “IPR basics and Indian Patenting System”

SUMMARY

Date: 15.07.2016

A seminar on “**IPR basics and Indian Patenting System**” was held on 15th July 2016 in our college seminar hall and conducted by **Mr.T.Srihari, Professor, KSRIET**. The seminar aimed to create first level IPR awareness among the faculties, students and young intellectuals about the beneficial aspects of patenting their creative and novel ideas, inventions etc... Such awareness would in turn be highly essential for the promotion of creativity, research and technical advancements as well as application into market.

Dr.T.Srihari started the seminar by talking about what IPR actually is and explained it’s importance in the real economy. The seminar was very interactive and informative. Students were highly intrigued with the way, the various aspects of the rights to protect their brain child. He also spoke about how startups could benefit the most out of IPR and how it could boost a business.

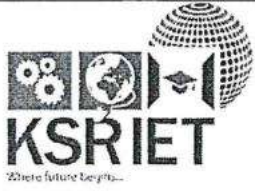

The different types of Intellectual Property Rights like Copyrights, Geographic Indications, Industrial Design, etc. He used real life examples to make the understanding of the subject at hand better. He also cited his own experiences to help explain the working of IPRs too. The basics of filing IPR, why it is essential, etc were also discussed.

The seminar concluded with an interactive Questions session where all the students asked their questions and doubts regarding IPR.

Brief about the Program:

MERF Talk is one of the forum activity comes under Mechanical Engineers Research Forum (MERF) which helps the students and faculty to get to know about recent technology and share their idea among other students. By this seminar others get to know about the Machining applications as alternate Machining for many uses. By studying this concept we can easily manufacturing the components using machining process.

Entrepreneurship Development Cell at KSRIET organized a seminar about “Converting proposal into hardware” on 21.12.2016. The main theme of the seminar is to guide the students in the path of entrepreneurship. Students are not aware of the Converting Proposal into Hardware. And also they need motivation for hardware design.

This seminar explained about the various funding agencies which are ready to provide funds for converting the proposal into product. Here we guided the faculties to motivate the student’s project in a manner of product development and to give awareness about fund proposal for their project. By making students project as product, we can make EDC into “Next Gen IEDC”.
