## Summary

If you ask my friends, my professors, the people I have worked with they will tell you that I am decisive, action-oriented, humble, willing to start a project from scratch and do what it takes to be successful in a given role. I don't judge success by job titles. No job is big or small. What matters to me is when someone puts their faith in giving you the responsibility to deliver.

I come from an mechanical engineering background, with experience of working as a marine engineer, with a good knowledge of process requirements and coordination, and my objective from the very beginning is to work first with people and then with machines. I believe technology is a tool while people are assets.

Specialties: Marine engineering operations, Plant Maintenance, Plant Operations, Plant Management, Job and process planning, Inventory Control, Internal Combustion Engine Maintenance

Max Marks	: 50
Branch	: EEE
Duration	: 2 Hrs
Date	: 16.09.2019
Time	: 04.30pm - 06.30pm
Each questions carry 2marks (2.5x2=50)	
1.	Two wattmeter method is used for measurement of power in a balanced three-phase load supplied from a balanced three-phase system. If one of the wattmeters reads half of the other (both positive), then the power factor of the load is A. 0.572 B. 0.652 C. 0.707 D. 0.956
2.	A stationary closed Lagrangian pattern on an oscilloscope has 3 horizontal tangencies and 2 vertical tangencies for a horizontal sine wave with frequency 3 kHz. The duration of the vertical segment is A. 1.5 kHz B. 2 kHz C. 3 kHz D. 4.5 kHz
3.	An unbalanced DC Wheatstone bridge is shown in the figure. At what value of $\rho$ with the magnitude of $V_1$ be maximum?  A. $\frac{R_1 R_2}{R_1 + R_2}$ B. $\frac{R_1 R_2}{R_1 + R_2 + R_3 + R_4}$ C. $\frac{R_1 R_2}{R_1 + R_2 + R_3}$ D. $\frac{R_1 R_2}{R_1 + R_2 + R_4}$

Academic Year/Sem	: 2019-20/ ODD	Max Marks	: 50
Branch/Subject	: CSE&IT/DS	Duration	: 2 Hrs
Date	: 25.09.2019	Time	: 04:30 to 06.30 pm

1. Consider two binary operators '↑' and '↓' with the precedence of operator being lower than that of the operator↑. Operator↑ is right associative while operator↓, is left associative. Which one of the following represents the parse tree for  $(7 \downarrow 3 \uparrow 4 \uparrow 3 \downarrow 2)$  ?

2. A max-heap is a heap where the value of each parent is greater than or equal to the value of its children. Which of the following is a max-heap?

K S R INSTITUTE FOR ENGINEERING AND TECHNOLOGY,  
TIRUCHENGODE, NAMAKKAL DISTRICT, TAMIL NADU.

3. Consider evaluating the following expression tree on a machine with load-store architecture in which memory can be accessed only through load and store instructions. The variables a, b, c, d and e are initially stored in memory. The binary operators used in this expression tree can be evaluated by the machine only when the operands are in registers. The instructions produce result only in a register. If no intermediate results can be stored in memory, what is the minimum number of registers needed to evaluate this expression?

(A) 2 (B) 9 (C) 5 (D) 3

4. An undirected graph  $G(V,E)$  contains  $n (n > 2)$  nodes named  $v_1, v_2, \dots, v_n$ . Two nodes  $v_i, v_j$  are connected if and only if  $0 < |i - j| \leq 2$ . Each edge  $(v_i, v_j)$  is assigned a weight  $i + j$ . A sample graph with  $n = 4$  is shown below

What will be the cost of the minimum spanning tree (MST) of such a graph with  $n$  nodes?

## HIGHER EDUCATION CELL

### *SEMINAR REPORT*

The session starts with Prayer song followed by the chief guest introduction **Mr. Lakshminarayana Pattaswamy, Director, Academic Sales and Liasioning, Mindvis, Coimbatore** and welcome Address by the higher education cell co-ordinator, invite all respected chief guests and students with immense pleasure. The Felicitation address has given by Principal **Dr. M. Venkatesan** address to the students to follow our Chief guest inputs and to concentrate on career. Then the session proceeded by our guest **Mr. Lakshminarayana Pattaswamy, Director, Academic Sales and Liasioning, Mindvis** about the University Connect 2020: An aspect of India's foreign relation.

In discussion, the key to internationalisation in Indian higher education lies in the ability of its universities and colleges to attract foreign faculty and students to India. India has huge potential to do so: Its position in the global economy; the tremendous talent in its institutions and latent in the demographic bulge of young people who currently at college and heading towards its universities; and the strong foundations and relationships that have been built through growing international partnerships in research and teaching. Internationalisation needs strategic international cooperation and planning at system and institutional levels to create an enabling environment which encourages the flow of international students and faculty, and which incorporates it into the positive transformation of their institutions. Having been part of the internationalisation of the world's universities, this is time for the second phase of India's contribution to internationalisation in higher education – bringing it to India.

In this they are discussing about the challenge concerns how India and Indian higher education is perceived by students and academics in the Germany and elsewhere. Students need to be aware of the opportunities to study in India; the profile of Indian institutions needs to grow internationally to be more visible to young people abroad. A range of awareness raising activities is needed to build a lasting reputation with international students.

National, international and institutional barriers to credit recognition and quality assurance are also significant. Students want recognition for their studies abroad, and

they and their institutions want to be certain of the quality of education they will receive. Infrastructure, including classrooms, labs, equipment and living quarters need to meet mutually acceptable standards and expectations.

A flexible approach to the study abroad experience is important by both the sending and receiving institutions to incorporate different lengths of time at different levels of study, with correspondingly responsive visa regulations and permissions. Financial arrangements have to be realistic and clear to students and institutions.

Finally, both the receiving institution and the students (national and foreign) need to be prepared for the experience; intercultural awareness and an open mindset are important for the study or faculty visit to be successful and mutually beneficial.

<b>Brief Report of the Program</b>	<p align="center"><b>Report of the Event</b></p> <ul style="list-style-type: none"> <li>Alumni Interaction Program was held on 12.11.2020. Chief guest Mrs.R.Akalya addressed the students and she shared the following points to the students.</li> <li>Most students wait until their last year of engineering to start preparing for competitive exams. However, the experts who give tips to crack competitive exams believe that students have to start as early as possible.</li> <li>Most competitive exams will require you to develop quantitative aptitude and verbal reasoning. These skills will also help you during your engineering studies, making your regular classes easier for you.</li> <li>Try to create a schedule and stick to it, if you are someone prone to procrastination. Giving yourself a timetable will help you stay focused as you know exactly what to work on every day.</li> <li>Aim for shorter study sessions, rather than long-extended ones. Your mind can stay more active and efficient for shorter durations, helping you learn more in less time. Finally, students interacted and clarify their doubts from the chief guest.</li> </ul> <p align="center"><b>Sample Photos</b></p>

<b>Brief Report of the Program</b>	<p align="center"><b>Report of the Event</b></p> <ul style="list-style-type: none"> <li>Alumni Webinar was held on 27.04.2020. Initially in the address, Ms.V.NETHRAVATHI shared the following information.</li> <li>Today's students need to be prepared to communicate electronically with audiences throughout the world. Since email may be their first (and perhaps only) contact with someone, students must understand how the effort they put into their email will create a positive (or negative) impression.</li> <li>Despite English being the lingua franca of the scientific/business world, email writers need to be aware of culturally appropriate greetings and signatures.</li> <li>In addition, adopting the appropriate tone in email discourse is very important to the reception and successful interpretation of the intended message.</li> <li>The email writer is stressed as crucial to the accurate receipt of the writer's message; therefore, students learn the effect of tone and linguistic choices on different audiences.</li> </ul>

**Brief Report of the Program**

**Report of the Event**

- Alumni Webinar was held on 28.04.2020. Chief guest **Mr. A. ABDUL RAHMAN** addressed the students and he shared the following points to the students.
- Data scientists know what tools and technologies work best for any given task, from prototyping machine learning-based pipelines to deploying scalable data-based services across the enterprise.
- Data scientists want to work faster and smarter everywhere: data access, data pre-processing, feature engineering, model training, and testing.
- When data scientists work directly with subject matter experts, projects are better aligned with business objectives and closer to generating value for an organization
- For data scientists themselves, that means involving the right people, asking the right questions, and holding themselves responsible for practicing responsible AI.
- Finally, students interacted and clarify their doubts from the chief guest.

Chief guest Ms. VINUPRIYA KUMAR addressed the students and he shared the following points to the students.</li> <li>When you hear the term "software testing," do you think about one particular type of test?</li> <li>Most experienced developers understand that software testing isn't a singular approach, although, in the broadest sense, it refers to a collection of tests and evaluations that aim to determine whether a software application works as it should and if it can be expected to continue working as it should in real-world use scenarios.</li> <li>"Quality assurance is not the last link in the development process. It is one step in the ongoing process of agile software development. A good bug report can save time by avoiding miscommunication or the need for additional communication.</li> <li>Finally, students interacted and clarify their doubts from the chief guest.</li> </ul> <p align="center"><b>Sample Photos</b></p>

**Institution's Innovation Council (IIC)** of K S R Institute for Engineering and Technology in association with **Department of Electrical and Electronics Engineering** organized **“Webinar on Entrepreneurial Culture”** on 27.10.2020. **Mr. Shaik Mohammed** from KREO DIZZARTS, Bengaluru delivered the chief guest address to the participants. 25 faculties and 250 students various departments were attended the program successfully.

Students can able to

- To understand the entrepreneurship and small business
- To understand the entrepreneurial opportunities and challenges in a changing environment
- Identify personal attributes that enable best use of entrepreneurial opportunities
- Understand the function of the entrepreneur in the successful, commercial application of innovations

The Purpose of entrepreneurial culture requires to clarify beforehand these two constitutive terms: culture and entrepreneurship.

“**Culture**” is the collective programming of the mind which distinguishes the members of one group or category of people from another. “**Entrepreneurship**” is more of an attitude, a technique, a practice, and a discipline that can be taught and strengthened particularly through higher education and globally via the education system.

Developing an entrepreneurial culture and mindset has nowadays become a very popular idea all over the world, and has been considered a leverage for economic, social and societal development and also how the pedagogy adopted in teaching entrepreneurship fits with the requirements of building future entrepreneurs.
