

K S R Institute for Engineering and Technology

(Approved by AICTE New Delhi & Affiliated to Anna University Chennai)

BE (CSE,EEE,ECE,Mech)&B.Tech (IT) Programmes are Accredited by NBA

6.3.3. PROFESSIONAL DEVELOPMENT /ADMINISTRATIVE TRAINING PROGRAMS ORGANIZED BY THE INSTITUTION FOR TEACHING AND NON TEACHING STAFF DURING THE LAST FIVE YEARS

S.No.	Title of the professional development program organised for teaching staff	Page No.
ACADEMIC YEAR 2018-2019		
1.	Firewall, Installation, Configuration & Management	6 – 7
2.	Hadoop (Hortonworks)	8 – 9
3.	Emerging Trends in Advanced Computing	10 – 11
4.	Teaching Techniques	12 – 12
5.	Advanced Features of JAVA programming	14 – 15
6.	Data Analytics for Early Diagnosis and Treatment	16 – 17
7.	PHP Programming	18 – 19
8.	Smart Gate pass and Leave Maintenance	20 – 21
9.	Introduction to Internet of Things	22 – 23
10.	Blood Master System	24 – 26
11.	Waste Management System using IOT for Smart Cities	27 – 28
12.	E-Electricity Measurement using Mobile Phones	29 – 30

13.	Analysis of Electromagnetic fields and its Applications Using Ansys Software	32 – 33
14.	Teaching Methodology	34 – 35
15.	Challenges in Charging of Electrical Vehicle for Green Environment	36 – 37
16.	Artificial Intelligence in Medical and healthcare Applications	38 – 39
17.	Emerging Trends in Smart Grid and Energy Storage Technologies for Sustainable Energy Management	40 – 41
18.	Research Trends on Smart Waste Management System for Batteries	42 – 43
19.	Comparative analysis of different modulation techniques for free space optical communication	45 – 47
20.	Object Recognition	48 – 50
21.	Design of logic circuits using 180nm CMOS transistors	51 – 53
22.	Cloud Computing	54 – 56
23.	Conversion of a Novel Stegano image into a 3D stereo image	57 – 59
24.	Active utilization of Grey water in residential buildings using IoT	60 – 62
25.	Multiband microstrip patch antenna for 5G wireless applications using MIMI techniques	63 – 65
26.	How to write a successful funding proposal	66 – 68
27.	Automatic Tollgate Collection	69 – 71
28.	Automatic segmentation of right ventricle from cardiac: MRI	72 – 74
29.	Low power reversible sequential circuits	75 – 77
30.	Routing protocol for low power lossy network in WSN	78 – 80
31.	Seminar on Importance of Intellectual Property rights	83 – 93
32.	Seminar on “Corrosion Studies on Ceramic Coating on Stainless Steel in Synthetic Marine Environment”.	94 – 105
33.	Seminar on Micro-Electro-Mechanical Systems (MEMS) Fabrication Process.	106 – 116

34.	Seminar on Investigation and Improving Impact Strength of Hybrid Composites on Two Wheeler Side.	117 – 128
35.	Seminar on Implementation of IOT in Smart Irrigation System Using Arduino Processor.	129 – 140
36.	Seminar on Design and analysis of composite materials using banana fiber for floor tiles	141 – 151
37.	Seminar on Design and analysis of pneumatic gear shaper	152 – 162
38.	Seminar on Evaluation of biogas production potential from raw and processed agricultural wastes.	163 – 173
39.	Analysis of Firefly and Spectral Route Optimization Algorithm for WMSNs	175 – 179
40.	OR Tools – Google Optimization	180 – 182
41.	How to get Patents for Research Work	183 – 184
42.	Data Selection for Speech Recognition	185 – 186
43.	A Secure Cloud Computing Based Framework for the Blood Bank	187 – 189
44.	Improving the Energy Efficiency of Wireless Sensor Networks through Wireless Energy Transfer	190 – 192
45.	Acharyaa Devo Bhava	193 – 198
46.	Induction Program	199 – 200

S.No.	Title of the professional development program organised for Non teaching staff	Page No.
ACADEMIC YEAR 2018-2019		
47.	Hands on MS Office and Hardware Configuration	201 – 211
48.	Training Program on Basics of House Wiring	212 – 214
49.	Free Eye Camp for Drivers	215 – 218

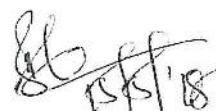

ACADEMIC YEAR
2018 - 2019

K S R INSTITUTE FOR ENGINEERING AND TECHNOLOGY
Department of Computer Science and Engineering
FISH (Faculty Idea Sharing)
ACADEMIC YEAR 2018-2019
Schedule

All Faculty members are informed to prepare their topic as per the scheduled date.

S.No	Staff Name	Topic	Date Scheduled	Actual Date
1.	Mr.V.Gopinath	Firewall,Installation,Configuration & Management	11.06.2018	22.06.2018
2.	Mr.R.Venkatesan	Hadoop (Hortonworks)	26.06.2018	13.07.2018
3.	Mr.R.Gopal	Emerging Trends in Advanced Computing	16.07.2018	31.07.2018
4.	Mrs.R.Sathya Priya	Teaching Techniques	02.08.2018	27.08.2018
5.	Mr.M.P.Jegadeesan	Advanced Features of JAVA programming	29.08.2018	17.09.2018
6.	Ms.D.Kavinya	Data Analytics for Early Diagnosis and Treatment	18.09.2018	28.09.2018
7.	Dr.G.Malathy	PHP Programming	12.01.2019	31.01.2019
8.	Dr.M.Jawahar	Smart Gate pass and Leave Maintenance	24.01.2019	18.02.2019
9.	Mr.M.Jaganathan	Introduction to Internet of Things	06.02.2019	27.02.2019
10.	Mrs.R.Deebika	Blood Master System	01.03.2019	19.03.2019
11.	Mr.V.Prakasham	Waste Management System using IOT for Smart Cities	25.03.2019	04.04.2019
12.	Ms.N.Sharmila	E-Electricity Measurement using Mobile Phones	10.04.2019	30.04.2019

TIRUCHENGODE – 637 215**

Department of Electronics and Communication Engineering

CIRT (Centre for Innovation in Research and Teaching)

REF: KSRIET/ECE/CIRT/2018-2019/12

Date: 18/01/2019

CIRCULAR

This is to inform that Centre for Innovation in Research and Teaching (CIRT) is organizing a Knowledge sharing activity in our department on 22/01/2019 at 4.30 pm in ECE meeting Hall for the benefit of faculty members to enhance their knowledge. All faculty members are asked to attend the program and get benefited.

Topic: Routing Protocol for Low Power Lossy Network in WSN

Presented by: Ms.P.JANANI,AP/ECE

PRINCIPAL,
K. S. R. INSTITUTE FOR
ENGINEERING AND TECHNOLOGY,
K. S. R. KALVI NAGAR,
TIRUCHENGODE-637 215,
NAMAKKAL DI, TAMIL NADU.

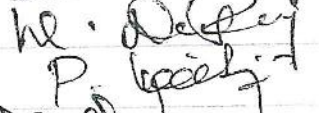

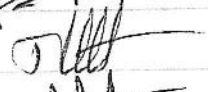

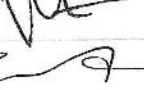

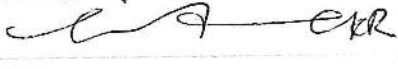

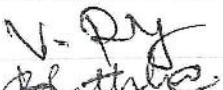

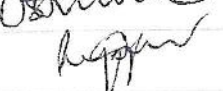

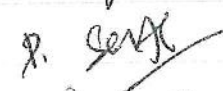

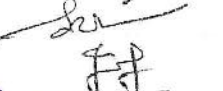

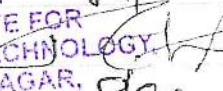

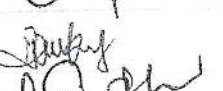

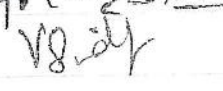

HoD 18/1/19

SEMESTER :- EVEN

04:30pm to 05:30pm.

TOPIC: Routing protocol for low power lossy network in WSN

Presented by :- Ms. P. Janani

Fig. MERF Seminar Talk - 01 by Ms. G.Anitha on 26.07.2018 at 12.45 pm

Brief about the Program:

MERF Talk is one of the forum activity comes under Mechanical Engineers Research Forum (MERF) which helps the students and faculty to get to know about today's globally competitive environment, intellectual property has placed itself on a pedestal in the context of economic growth and is becoming increasingly important. Intellectual Property (IP) is the fuel that powers the engine of prosperity, fostering invention and innovation. The focus of the seminar was to promote the creation, protection & enforcement of the Intellectual Property Rights amongst various stakeholders

Brief about the Program:

MERF Talk is one of the forum activity comes under Mechanical Engineers Research Forum (MERF) which helps the students and faculty to get to know about recent technology and share their idea among other students. This seminar provided a detailed overview about the Design and analysis of composite materials using banana fibre for floor tiles and also provides a scope of research opportunities available in the current Tiles development and preparation.

Seminar Report

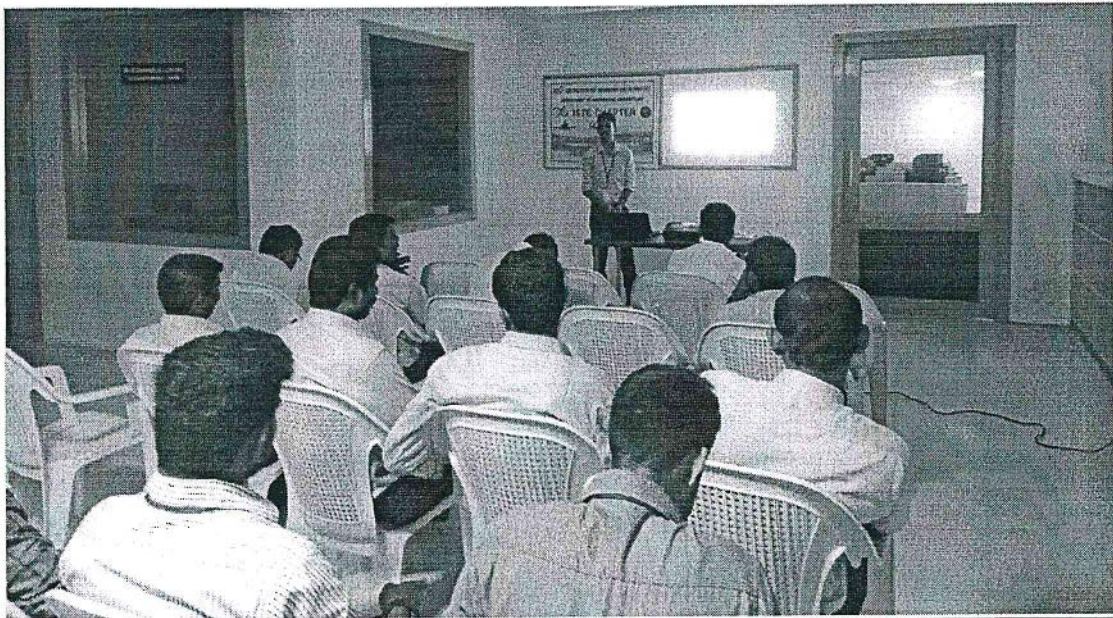

Name of Forum/ Cell/ CoE: Mechanical Engineers Research Forum (MERF)					
Academic Year:	2018- 2019	Semester:	ODD	Date &Time:	03.10.2018 & 12.45pm
Name of the Programme:	MERF Seminar Talk - 07	Title:	Design and Analysis of Pneumatic Gear Shaper		
Venue:	CAD Lab	No. of Participants Attended :	60		

Resource Person

Name: **Mr.P. R.MANOJKUMAR**

Designation: IV- Year , Department of Mechanical Engineering

Company/ Institution: KSR Institute For Engineering and Technology

Brief about the Program:

MERF Talk is one of the forum activity comes under Mechanical Engineers Research Forum (MERF) which helps the students and faculty to get to know about recent technology and share their idea among others. This seminar provided a detailed overview about the Design and Analysis of Pneumatic Gear Shaper, drawbacks of the existing mechanical linkage type, modifications yet to be incorporated in the existing new design and also provided a future scope of the project.

Analysis of Firefly and Spectral Route Optimization Algorithm for WMSNs

Abstract

Wireless Sensor Network (WSN) consists of small low-cost, low-power multifunctional nodes interconnected to efficiently aggregate and transmit data to sink. Cluster-based approaches use some nodes as Cluster Heads (CHs) and organize WSNs efficiently for aggregation of data and energy saving. A CH conveys information gathered by cluster nodes and aggregates/compresses data before transmitting it to a sink. However, this additional responsibility of the node results in a higher energy drain leading to uneven network degradation. Low Energy Adaptive Clustering Hierarchy (LEACH) offsets this by probabilistically rotating cluster heads role among nodes with energy above a set threshold. CH selection in WSN is NP-Hard as optimal data aggregation with efficient energy savings cannot be solved in polynomial time. In this work, a modified firefly heuristic, synchronous firefly algorithm is proposed to improve the network performance. Extensive simulation shows the proposed technique to perform well compared to LEACH and energy-efficient hierarchical clustering. Simulations show the effectiveness of the proposed method in decreasing the packet loss ratio by an average of 9.63% and improving the energy efficiency of the network when compared to LEACH and EEHC.

OR Tools – Google Optimization

Abstract

OR-Tools is an open source software suite for optimization, tuned for tackling the world's toughest problems in vehicle routing, flows, integer and linear programming, and constraint programming. After modeling your problem in the programming language of your choice, you can use any of a half dozen solvers to solve it: commercial solvers such as Gurobi or CPLEX, or open-source solvers such as SCIP, GLPK, or Google's GLOP and award-winning CP-SAT. The suite contains: A constraint programming solver; A linear programming solver; Wrappers around commercial and other open source solvers, including mixed integer solvers; Bin packing and knapsack algorithms; Algorithms for the Traveling Salesman Problem and Vehicle Routing Problem; Graph algorithms (shortest paths, min cost flow, max flow, linear sum assignment).

DATA SELECTION FOR SPEECH RECOGNITION

ABSTRACT

This paper presents a strategy for efficiently selecting informative data from large corpora of transcribed speech. We propose to choose data uniformly according to the distribution of some target speech unit (phoneme, word, character, etc). In our experiment, in contrast to the common belief that "there is no data like more data", we found it possible to select a highly informative subset of data that produces recognition performance comparable to a system that makes use of a much larger amount of data. At the same time, our selection process is efficient and fast.

A Secure Cloud Computing Based Framework for the Blood Bank

Abstract

A blood Bank can be defined as a bank or storage place where blood is collected, preserved and used whenever needed or demanded. Everyone is aware that the traditional blood bank management system includes paperwork. Its way of working is not efficient enough at the time of emergency situations. The main aim of creating cloud-based blood bank system is to make the blood available on time to the people, even in emergency situations. With the help of this project, the user can be able to view information about every entity related to blood bank i.e. hospitals, donors, a location of another blood bank etc. The security factor is maintained properly. Every time the new user accesses the system as a donor, he/she has to register himself/herself and provide a proof of their identity like license or government document on which the blood group of the person is mentioned. This project will consist of the android application which can be used in the smart phones; it will contain all the information of the donor and nearby hospitals. The application will also contain a GPS (Global Positioning System) system to track the location of the nearby blood banks or hospitals. Every registered user will get the notification regarding health checkup drives, blood donation camps in particular area etc. As the person did not need to go out far, for the search of the blood banks and hospitals, this application helps to save the time to a great extent. This also helps in correct and quick decision making.

ABSTRACT

With the recent development in the communication field wireless sensor plays a decisive role in various application areas like medicine, mechanical engineering, embedded technology, agriculture, military, etc., The demand for sensor is rapidly growing day by day. Wireless sensor networks are formed by collection of network of autonomous nodes which have been employed in a wide variety of applications. As sensor nodes are battery powered, guaranteeing the energy supply for long time has persisted as a big challenge to the sensor node lifetime.

The wireless energy transfer has been a recent emerging technology in wireless sensor network. This technology is a promising alternative to the power constraint problem in wireless sensor network. Energy is the important constraint in a sensor network, which can be improved by different technologies. Energy harvesting techniques can scavenge some amount of energy but still it's not enough. Lots of researchers put effort to solve this problem which results in a wireless energy transfer. In this technology wireless charging vehicle travels along a pre-planned path in the sensor network. Our goal is to minimize energy consumption of the entire network, while ensuring that each sensor node is supplied the required energy by charging without the node dead.

With the development in this technology, multiple nodes can be charged simultaneously by wireless charging vehicles. Scheduling of wireless charging vehicles help to improve the network lifetime. In addition to optimizing the travel time of the wireless charging vehicle, the cost arising from the travel path of charger between the nodes must also be taken into account. However, little work has been reported in improving the energy efficiency of wireless sensor network through wireless energy transfer technology.
