

K S R Institute for Engineering and Technology

(Approved by AICTE New Delhi & Affiliated to Anna University Chennai)

BE (CSE,EEE,ECE,Mech)&B.Tech (IT) Programmes are Accredited by NBA

6.3.3. PROFESSIONAL DEVELOPMENT /ADMINISTRATIVE TRAINING PROGRAMS ORGANIZED BY THE INSTITUTION FOR TEACHING AND NON TEACHING STAFF DURING THE LAST FIVE YEARS

S.No.	Title of the professional development program organised for teaching staff	Page no.
ACADEMIC YEAR 2019– 2020		
1.	Node JS and React JS	6 – 7
2.	Cyber security Essentials	8 – 9
3.	Artificial Intelligence	10 – 11
4.	The Joy of Teaching 2.0	12 – 13
5.	Computer and communication networks	14 – 15
6.	Innovative teaching and research practice	16 – 19
7.	Publishing Articles in SCI Indexed Journals and Filing IPR	20 – 21
8.	Insight and Trend in Data Analytics	22 – 24
9.	Evolution of IOT and It's Real time application	25 – 26
10.	Deep Learning with Python	27 – 28
11.	Disruptive Technology	29 – 30
12.	Ethics, Moral Values and Character Building in Technical Education	32 – 33

13.	SCI Indexed Journals and Filing IPR	34 – 35
14.	How to write a Research Paper	36 – 37
15.	Internet of Things	38 – 39
16.	Instructional and Assessment Characteristics of OBE Framework	40 – 41
17.	Intellectual Property: Copyright, Trademarks Patents	42 – 43
18.	Examination Reforms towards Quality Education	44 – 45
19.	Electric Vehicles	46 – 47
20.	Artificial Intelligence	48 – 49
21.	21st century teaching and learning process	51 – 52
22.	Fastening Ethics, moral values and character building	53 – 54
23.	Mems– Micro electro mechanical systems	55 – 56
24.	Embedded system project design	57 – 58
25.	Active cooperative learning	59 – 60
26.	Speech processing	61 – 62
27.	How to choose research problem	63 – 64
28.	Wireless sensor networks for condition monitoring of Smart grids	65 – 66
29.	Introduction and Need of Entrepreneurship during covid Time	67 – 68
30.	Recent up– gradation of Image processing in medical applications	69 – 70
31.	Smart agriculture using IoT	71 – 72
32.	Implementation of GFDM transmitter for 5G waveform generation	73 – 74
33.	Research of mechanical Engineering using Artificial Engineering and Mechine Learning	76 – 90

34.	Seminar on Overview of Non Destructive testing	91 – 99
35.	Seminar on An Overview on Funding Agencies for Grants	100 – 108
36.	Seminar on 3D Printing – A tool for Production)	109 – 118
37.	Seminar on Green Auto mobility : Tesla Motors and the Symbolic Dimensions of Green Cars)	119 – 127
38.	Seminar on Hybrid Vehicle – A Study on Technology	128 – 137
39.	Big Data Analytics for Healthcare Industry: Impact, Applications and Tools	138 – 140
40.	Block chain Technologies	141 – 143
41.	Block chain Applications in the Biomedical Domain: A Scoping Review	144 – 146
42.	Teaching Learning Process	147 – 148
43.	Using ICT Tools in Teaching	149 – 150
44.	Artificial Intelligence in Health care	151 – 152
45.	Data Analytics using R programming	153 – 154
46.	21st century teaching and learning process	155 – 157

S.No.	Title of the professional development program organised for Non teaching staff	Page no.
ACADEMIC YEAR 2019– 2020		
47.	Orientation Programme on MS Office and Hardware Trouble shooting	158 – 169
48.	Training Program on Usage of Fire Extinguisher	170 – 172
49.	Free Eye Camp	173 – 176

ACADEMIC YEAR
2019 - 2020

K S R INSTITUTE FOR ENGINEERING AND TECHNOLOGY
Department of Computer Science and Engineering
FISH (Faculty Idea Sharing)
ACADEMIC YEAR 2019-2020
Schedule

All Faculty members are informed to prepare their topic as per the scheduled date.

S.No	Staff Name	Topic	Date Scheduled	Actual Date
1.	Mr.R.Gopal	Node JS and React JS	16.07.2019	31.07.2019
2.	Mrs.R.Sathya Priya	Cybersecurity Essentials	02.08.2019	22.08.2019
3.	Mrs.S.Vimala	Artificial Intelligence	29.08.2019	12.09.2019
4.	Mrs.V.Sowmitha	The Joy of Teaching 2.0	13.09.2019	30.09.2019
5.	Ms.D.Kavinya	Computer and communication networks	04.10.2019	24.10.2019
6.	Dr.P.Vijayalakshmi	Innovative teaching and research practice	10.12.2019	30.12.2019
7.	Dr.M.Vimaladevi	Publishing Articles in SCI Indexed Journals and Filing IPR	31.12.2020	11.01.2020
8.	Dr.M.Jaganathan	Insight and Trend in Data Analytics	02.01.2020	30.01.2020
9.	Mr.V.Prakasham	Evolution of IOT and It's Real time application	28.02.2020	13.03.2020
10.	Mr.R.Venkatesan	Deep Learning with Python	02.03.2020	27.03.2020
11.	Mr.V.Gopinath	Disruptive Technology	03.04.2020	15.05.2020

Department of Electronics and Communication Engineering

CIRT (Centre for Innovation in Research and Teaching)

REF: KSRIET/ECE/CIRT/2019-2020/12

Date: 09/03/2020

CIRCULAR

This is to inform that Centre for Innovation in Research and Teaching (CIRT) is organizing a Knowledge sharing activity in our department on **10/03/2020 at 4.00 pm in ECE meeting Hall** for the benefit of faculty members to enhance their knowledge. All faculty members are asked to attend the programme and get benefited.

Topic: Implementation Of GFDM Transmitter For 5G Waveform Generation

Presented by: Dr.R.NANDAKUMAR, HoD/ECE

HoD 9/3/20

PRINCIPAL,

**DEPARTMENT OF MECHANICAL ENGINEERING
MECHANICAL ENGINEERS RESEARCH FORUM (MERF)**

Academic Year:	2020- 2021	Semester:	ODD	Date &Time:	24.09.2020 & 11:30AM
Name of the Programme:	Webinar	Title:	Research of Mechanical Engineering Using Artificial intelligence and Machine Learning		
Through Google Meet		No. of Participants Attended:		140	

Dr. K. Venkatesh Raja,
Associate Professor,
Department of Mechanical Engineering,
Sona College of Technology

Brief about the Program:

The session starts with Prayer song by CollegeChoir. Then welcome Address by **Selvi.R.Sandhiya**, II Yr/Mechwelcomes the respected chief guests and students with immense pleasure. Then Chief Guest Introductionhas given by **Selvi. P. Deepa**, II Yr/Mech about the chief guest and welcome him to share his experience through this session.**Dr. K. Venkatesh Raja**, Associate Professor,Department of Mechanical Engineering,Sona College of Technology,Starts his session by Interacting with students and give tips to start a business and how to run it in a effective way.

Dr. K. Venkatesh Raja clarifies the doubts raised by the students. Finally Selvi.R.Sandhiya, II Yr/MechProposed Vote of Thanks.

Brief about the Program:

MERF Talk is been introduce to create awareness on recent research areas and funding proposals for innovative ideas among the students and faculty. This presentation represents overview of Non Destructive testing and its Applications in the manufacturing Industries and also provided the information about the research opportunities in the NDT.

Brief about the Program:

MERF Talk is been Numbers of patent applications have never been higher and there are a number of examples that patents have helped support the development of an ever-increasing range of technology. Yet this success has not given rise to universal satisfaction, either within the immediate circle of administrators and users of the patent system, or among the intended beneficiaries of the system more widely in society. The system today faces two main challenges: an internal challenge, concerning the actual operation of the system; and an external challenge, concerning the policy role, and the economic and social impact of the patent system.

Brief about the Program:

This Seminar provided the following information's to the participants for understanding about the 3D printing technology revolution in the manufacturing industries

- 3D printing creates parts by building up objects one layer at a time. This method offers many advantages over traditional manufacturing techniques (for example CNC machining), the most important of which that apply to the industry as a whole are covered in this article.
- 3D Printing is unlikely to replace many traditional manufacturing methods yet there are many applications where a 3D printer is able to deliver a design quickly, with high accuracy from a functional material.
- Understanding the advantages of 3D printing allows designers to make better decisions when selecting a manufacturing process and enables them to deliver an optimal product.

Brief about the Program:

MERF Talk is one of the forum activity comes under Mechanical Engineers Research Forum (MERF) which helps the students and faculty to get to know about recent technology and share their idea among other students. This seminar briefed about the functions and the working of hybrid vehicle that going to take over other vehicle. This seminar focused how the parallel hybrid vehicle fuel consumption was comparatively low than the series hybrid vehicle. MERF Talk will make students think innovative and improve their skill.

Big Data Analytics for Healthcare Industry: Impact, Applications, and Tools

Abstract

In recent years, huge amounts of structured, unstructured, and semi-structured data have been generated by various institutions around the world and, collectively, this heterogeneous data is referred to as big data. The health industry sector has been confronted by the need to manage the big data being produced by various sources, which are well known for producing high volumes of heterogeneous data. Various big-data analytics tools and techniques have been developed for handling these massive amounts of data, in the healthcare sector. In this paper, we discuss the impact of big data in healthcare, and various tools available in the Hadoop ecosystem for handling it. We also explore the conceptual architecture of big data analytics for healthcare which involves the data gathering history of different branches, the genome database, electronic health records, text/imagery, and clinical decisions support system.

Key words: big data; healthcare; Hadoop; MapReduce

Blockchain Technologies

Abstract

A blockchain is a chain of blocks that contain data or information. Despite being discovered earlier, the first successful and popular application of the Blockchain technology came into being in the year 2009 by Satoshi Nakamoto. He created the first digital cryptocurrency called Bitcoin through the use of Blockchain technology. Each block in a blockchain network stores some information along with the hash of its previous block. A hash is a unique mathematical code which belongs to a specific block. If the information inside the block is modified, the hash of the block will be subject to modification too. The connection of blocks through unique hash keys is what makes blockchain secure.

While transactions take place on a blockchain, there are nodes on the network that validate these transactions. In Bitcoin blockchain, these nodes are called as miners and they use the concept of proof-of-work in order to process and validate transactions on the network. In order for a transaction to be valid, each block must refer to the hash of its preceding block. The transaction will take place only and only if the hash is correct. If a hacker tries to attack the network and change information of any specific block, the hash attached to the block will also get modified. The breach will be detected as the modified hash will not match with the original one. This ensures that the blockchain is unalterable as if any change which is made to the chain of blocks will be reflected throughout the entire network and will be detected easily.

In a nutshell, here's how blockchain allows transactions to take place:

1. A blockchain network makes use of public and private keys in order to form a digital signature ensuring security and consent.
2. Once the authentication is ensured through these keys, the need for authorization arises.
3. Blockchain allows participants of the network to perform mathematical verification and reach a consensus to agree on any particular value.
4. While making a transfer, the sender uses their private key and announces the transaction information over the network. A block is created containing information such as digital signature, timestamp, and the receiver's public key.
5. This block of information is broadcasted through the network and the validation process starts.
6. Miners all over the network start solving the mathematical puzzle related to the transaction in order to process it. Solving this puzzle requires the miners to invest their computing power.
7. Upon solving the puzzle first, the miner receives rewards in the form of bitcoins. Such kind of problems is referred to as proof-of-work mathematical problems.

Blockchain Applications in the Biomedical Domain: A Scoping Review

Abstract

Blockchain is a distributed, immutable ledger technology introduced as the enabling mechanism to support cryptocurrencies. Blockchain solutions are currently being proposed to address diverse problems in different domains. This paper presents a scoping review of the scientific literature to map the current research area of blockchain applications in the biomedical domain. The goal is to identify biomedical problems treated with blockchain technology, the level of maturity of respective approaches, types of biomedical data considered, blockchain features and functionalities exploited and blockchain technology frameworks used. The study follows the PRISMA-ScR methodology. Literature search was conducted on August 2018 and the systematic selection process identified 47 research articles for detailed study. Our findings show that the field is still in its infancy, with the majority of studies in the conceptual or architectural design phase; only one study reports real world demonstration and evaluation. Research is greatly focused on integration, integrity and access control of health records and related patient data. However, other diverse and interesting applications are emerging, addressing medical research, clinical trials, medicines supply chain, and medical insurance.
