the 1990s, the number of people with a mental health problem has increased in the UK (Mental Health Act 1983, 1990).

There is a growing awareness of the need to improve the lives of people with mental health problems. The Department of Health (1999) has set out a vision of a new mental health system, which will be based on the following principles:

- People with mental health problems should be treated as individuals, with their own needs and wishes.
- People with mental health problems should be given the opportunity to participate in decisions about their care and treatment.
- People with mental health problems should be given the opportunity to live in their own homes and communities.

These principles are reflected in the new Mental Health Act 2003, which came into effect in 2005.

The new Act is based on the following principles:

- People with mental health problems should be given the opportunity to live in their own homes and communities.
- People with mental health problems should be given the opportunity to participate in decisions about their care and treatment.

The new Act is based on the following principles:

the 1990s, the number of people in the world who are living in poverty has increased from 1.2 billion to 1.6 billion (World Bank 2000).

There are a number of reasons for this increase. One of the main reasons is the rapid population growth in the developing countries. The population of the world is expected to reach 8 billion by the year 2025 (United Nations 2000). This increase in population will put a tremendous pressure on the world's resources, particularly in the developing countries.

Another reason for the increase in poverty is the rapid technological change in the developed countries. The rapid technological change has led to the displacement of many workers in the developed countries. This displacement has led to a large number of people who are living in poverty in the developed countries.
