### **1. Introduction:**

- ❖ e-governance is a buzzing term which now finds ample relevance in any organization's dictionary. E-governance in educational sector facilitates the processing and maintenance of information, improves transparency in administration and provides faster information dissemination. Its applications need a centralized approach in document storage and retrieval. An efficient push and pull of information can be facilitated using a proper Management Information System which can be customized and built according to an institutions need.

### **2. Concept of e-governance:**

- ❖ The concept of e-governance is the application of information and communication technologies to transform the efficiency, transparency and accountability of informational and transactional exchanges with in Institution.

### **3. Need of e-governance:**

- ❖ e-governance in education provides new ways of communicating to the students, imparting education and organizing and delivering information and services. It will be helpful in the betterment of the higher education and increase the number of employable students.

### **4. Benefits of e-governance:**

- ❖ Centralized information access from anywhere.
- ❖ Increases transparency.
- ❖ Innovative teaching tools.
- ❖ Less paper work.
- ❖ Students can access virtual lectures and webinars.

### **5. Advantages of e-governance:**

- ❖ e-governance leads to multiple advantages to Higher Education. The implementation of e-governance may increase the broad participation of the students in the process of achieving good education goals at all levels by providing the possibility of online discussion groups and by enhancing the fast development and effectiveness of the learning methods.
- ❖ e-governance can help in continuous monitoring, assessment evaluation of the teachers.

- ❖ It can create the transparency between college and students.
- ❖ After the implementation of e-governance one can improve the delivery of services to students, faculty by providing services like enrollment, examination, result, feedback, request for documents, request for certificates, etc.

#### **6. Key Challenges of implementing e-governance in Higher Education:**

- ❖ Educational institutions may have various requirements that include computerization and management of processes such as registration, admission, student information, classes, time table, transport, attendance, library, salary and expenses, examinations, performance, grades, hostels, security and reports.
- ❖ The solution is designed to make the system user-friendly, time saving and cost saving also. Many of them are flexible enough to adapt to the changing educational environment efficiently and quickly.

#### **7. Benefits to stakeholders of Higher Education:**

- ❖ e-governance initiatives can give a better interface and opportunity to students, parents, teachers and administrative management.
- ❖ Implementation of e-governance in technical institution will enable their effective & real time monitoring by stakeholders, own managements, parents of the students & the society, thereby forcing them to maintain quality & become more responsible.

## Policy Statement

### Policy:

- ❖ In order to provide simpler and efficient system of governance within the institution, it is decided to adopt and implement e-governance in maximum activities of the Institution.
- ❖ The institution has already started with e-governance in some aspects of functioning like library, accounts, etc. But, now It has been resolved to implement e-governance in many more areas and with this aim in view this policy framework has been drafted.

### Implementation of e-governance:

- ❖ **Website:** The website of the college needs to be revamped taking into account the new changes. The website should act as a mirror of the college activities. Information about all activities, important notices, etc should be made easily available to the outsiders. For this purpose, a separate service provider/web designer can be identified. Along with it, training should be given to the existing staff who will undertake the responsibility of website administration and updation at the college level.
- ❖ **Administration:** Enterprise Resource Planning (ERP) aims at immediate availability of data in required formats that ease the work of staff and management and increase in transparency and accountability in administration. Facilities should be provided for online leave management of employees, internal communication between the employees etc. Students also must be able to obtain maximum services like hostel leave approval, bonafide certificates, etc. in online mode.
- ❖ **Accounts:** Tally software is being used for maintaining Finance & Accounts. Appropriate security measures should be taken for maintaining confidentiality of the transactions. Training to the existing staff and updation of the existing softwares must be done on timely basis.
- ❖ **Examination:** All the assessment marks have to be uploaded in the automation software which simplifies the work by expanding the analyzing capacity and faster feedbacks. Controller of Examination needs to supervise the entire process of examination under the guidance of the Principal of the college through e-governance.
- ❖ **Library:** We have the privilege of having one of the best library. To continue with this legacy, more and more e-learning resources are to be added for the benefit of the teachers and students. Library software needs to be updated timely. Also the Online Public Access Catalog

(OPAC) system should be converted into a web based service for others to utilize the library resources effectively. Similarly newer e-learning resources like journals, etc should be identified and subscribed taking into account the recommendations of the library advisory committee. Recommendations of the teachers and students also need to be taken into account while subscribing to these resources. Appropriate training to the staff and the students for using the e-learning resources should be provided.

- ❖ **Student Admission:** Regarding Student admission and support, the college has to make a great leap in the implementation of E-governance with a full automation of student admission procedures and maintenance of an exhaustive student profile.

**Maintenance:**

- ❖ Dedicated college level and department level coordinators are allocated for the maintenance and updation of e-governance. They do customization based on the requirement of the institution.
