Certificate of Participation

EDII/IEDP-IPR/20-02

This is to certify that..... **C.MADHANGOPAL**

Ksr Institute for Engineering and Technology

has participated in the "Intellectual Property Rights & Entrepreneurship" workshop organized by the PMO-IEDP (Programme Monitoring Office – Innovation & Entrepreneurship Development Programme) from 10th Jan to 11th Jan 2020 at Sona College of Technology, Salem.

Place: Salem.

Date: 11.01.2020

**Hub Co-ordinator
(Sona-Salem)**

SUMMARY:

Venue : Mechanical Department material testing lab

Hardness is resistance of material to plastic deformation caused by indentation. Hardness is the ability to withstand indentation or scratches. Brinell hardness Test characterizes the indentation Hardness of materials through the scale of penetration of an indenter, loaded on a material test-piece. It is one of several definitions of hardness in material science. Students observed all the procedures involved in testing the sample. All of the m noted the preliminary setup of the instrument. They also inspect the tested sample. Students correlate theory with the apparatus.

Type of Learning	: Problem Solving	Activity Name	: Tutorial
Date / Hour	: 21.08.2020 / 1, 2	Mode of conduction	: Online

Summary:

Tutorial is a method of transferring knowledge and used as a part of a learning process. More interactive and specific than a book reading or a lecture or a seminar, complete a task to an interactive problem solving method. This tutorial class was focused on how to find a formation of partial differential equation and solve partial differential equation with linear type, homogeneous and non-homogeneous type.

Summary:

In larger classes, it can be hard to get every student personally involved in the learning experience in smaller and more student-driven seminars; it's much easier to foster active learning, whether in the form of discussions, activities and exercises, or even having students take turns leading sessions themselves. And the intensity of these interactions means that you can go beyond the transmission of knowledge to higher-order learning like analysis, application, and creation. Students were separated by the group and present the seminar.

Summary:

Participative learning is an instructive method which focuses on encouraging students to become actively involved in their learning process. This process enhances a common understanding between the students and the teachers. Also, the students are empowered to be more independent and interdependent. The students are given exposure on Soft Skills, Presentation Skills and Professional behavior. They get a plenty of chances to brainstorm and interact with many groups. Also, they learn some techniques on how to face job interviews. The teachers make all the students good at handling interpersonal relations, taking appropriate decisions and gaining professional development. It provides students with an opportunity to gain professional values, knowledge, and skills.

Summary:

- Simulation of Channel Estimation, Synchronization & Equalization techniques.
- OFDM communication system consists of channel model through which data symbols are transmitted to the receiver. This channel model produces line of sight communication and also various reflections due to which multipath effect come to picture.
- In OFDM communication systems, at the transmitter digital to analog conversion and at the receiver, analog to digital conversion is carried out. DAC and ADC never have exactly the same sampling period. Due to this, intercarrier interference and the slow shift of the symbol timing point occurs and so orthogonality is lost. This results in need of Synchronization and Channel Equalization

- A case study involves an up-close, in-depth, and detailed examination of a particular case or cases, within a real-world context.
- A case study can highlight nearly any individual, group, organization, event, belief system, or action.
- Through case study, the presentation skills, communication skills and team work of the students get improved.

Year/Sem	: II / IV	Academic Year	: 2016-2017
Subject	: MA Probability and Queuing Theory	Name of the Faculty	: Mr.K.Suresh
Type of Learning	: Problem Solving	Activity Name	: Tutorial
Date/Hour	: 17.02.2017 / 3 & 4	Mode of conduction	: Offline

Summary:

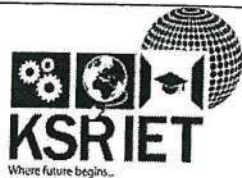

Students discussed the Binomial Distribution in Probability and Queuing Theory in this tutorial hour. Students were given a set of problems in Binomial Distribution and suggested solving these problems through Peer to Peer Learning. If they had any doubts during this session, then they clarified their doubts with concerned subject faculty. So that they can easily understand the basic concepts of probability, one and two dimensional random variables and to introduce some standard distributions applicable to engineering which can describe real life phenomenon. At the end of the session, students were able to understand provide necessary basic concepts in probability and random processes for applications such as random signals, linear systems in communication engineering.

Summary:

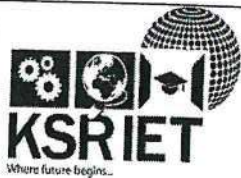

Students discussed the Rules of inference problem in Discrete Mathematics in this tutorial hour. Students were given a set of problems in rules of inference and suggested solving these problems through Peer to Peer Learning. If they had any doubts during this session, then they clarified their doubts with concerned subject faculty. So that they can easily understand the rules of inference to develop an algorithm for function oriented problems. At the end of the session, students were able to understand concepts of rules of inference problems.

Type of Learning	:	Experiential Learning	Activity Name	:	Roleplay
Date / Hour	:	19.7.2019 / 2	Mode of conduction	:	Offline

Summary:

Students develop social and communication skills through group activities associated with the teaching of data structures. Role play can be a very useful strategy to teach concepts that are perceived as abstract. However, meticulous preparation is required; otherwise not all students engage equally and feel that role play is a waste of time. Student Analysis the computational resources required for important problem types by alternative algorithms and their associated data structures, using mathematically rigorous techniques.
